Incremental partial ρ
B
Joint p, 72 hypotheses
Holm
BY
−log10 joint p (9,999 draws)
C
Component probabilities
−log10 p, target shuffle D
−log10 p, gene label M
Restricted
Unrestricted
D
Registered vs common support
Common-support ρ
Registered ρ (4 readouts)
E
Attention-free sensitivity
ρ, all gene-level edges
ρ, six-readout edges
